

MAGNETIC HANDLING

MAGNETIC HEAD

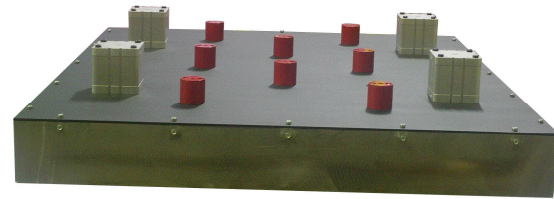

TECHNICAL DATA SHEET

Magnetic system used for safe and efficient handling of cans and twist-off capsules. Normally used in the canning and metallographic industry for palletizing and depalletizing of any container fitted with metal lid.

Magnetic application specially designed to increase production and decrease the possible damage to the product. It is a safe and reliable method for automated processes.

The magnetic heads can be manufactured in different dimensions and powers (with Ferrite or Neodymium magnets) according to the product to be transported. The magnetic palletizers are equipped with pneumatic cylinders for lifting and lowering of the magnetic circuit.

We have extensive experience in the manufacture of such magnetic systems for handling. Please contact us and we will design the best application for your need.

Standard measures

MODEL	FORMATO	Length MM	Width MM	Thickness MM	Num. cylinders
PM890890F	EMPTY CAN	890	890	120	4
PM10001000F	EMPTY CAN	1000	1000	120	4
PM12001100F	EMPTY CAN	1200	1100	120	4
PM13001100F	EMPTY CAN	1300	1100	120	4
PM15001200F	EMPTY CAN	1500	1200	120	4
